A. Same real BiMatching outputs; diagnostic only
Original head (FP64)
Fixed variance at real reference
Median candidate logit span
T/11
T/22
BM/11
BM/22
B. Sensitivity to candidate features recovers
Original head
Fixed variance
Median L2 norm of contrast gradient
3,721x
3,473x
3,309x
2,831x
C. Trained weights; local Silver 4214 CPU
Transformer + BiMatching
BiMatching Only
CPU forward latency (ms)
Candidates (same 12 real states)
D. Existing cluster runs; mean of seeds 11/22
Learner update phase
Worker critical-path lower bound
Unresolved parent/IO/other residual
Training wall time (h)
Transformer + BM
BM Only
